EDITOR'S NOTE**THE TEAM:**

Dear Readers,

It gives me immense pleasure to present the first issue of the Eagle's Bulletin for this academic year. I am really happy to welcome Ananya Pandey, Ananya Venigalla, Ansh Sonthalia, Gaurav Arutla, Leisha Agarwal, Medha Koppula, Niyati Reddy, Rahul Iyer, Roopa Veeramalla, Samvit Reddy Punam, Shravya Reddy, Shreenidhi Chandrapu, Sivani Jaggavarapu, Torita Chakraborti and Urvi Gupta to the team of writers.

For our returning readers, we express our deepest gratitude for your unwavering support and enthusiasm. Your readership has been the main reason for our growth and success as a newspaper. As we step into this fresh new chapter, we pledge to continue delivering thought provoking and entertaining content.

To our new joiners, we extend a heartfelt welcome to the Eagle's Bulletin Team. We are thrilled to work with you and hope that you find your time as a part of the Bulletin fruitful. We invite you to embark on this journey with us. Together, let us soar high like the eagle, embracing challenges and learning from each other as we strive for excellence in every aspect of our school life.

Thank you for trusting us with your readership and support. I hope you all enjoy reading this month's issue of the Eagle's Bulletin and find it thought provoking and entertaining. If you have any queries, feel free to email me at sanjana.iver@indusschoolhyd.com.

FEATURE ARTICLE

Beyond Utensils – India's Hand-To-Mouth Dining Tradition

~ Ishanvi Tupili , Grade 10

Eating with hands is a deep-rooted cultural tradition in India, spanning back thousands of years to ancient civilizations. However, this cherished practice has been unjustly stigmatized as "uncivilized" by some.

Hand-to-mouth dining has a profound historical significance in India. Before the advent of utensils, it was a natural and practical way for people to consume their meals. Over time, this tradition became deeply intertwined with Indian culture, reflecting values of togetherness, respect, and appreciation for food. In India, eating with hands is not simply a matter of convenience, it is a sensory experience that connects individuals with their food.

The tradition is based on the belief that each finger corresponds to one of the five elements—earth, water, fire, air, and space. When hands are used to eat, it is thought that the elements are in balance,

enhancing the flavors and nutritional benefits of the meal. Moreover, hand-to-mouth dining in India is a social activity that nurtures unity and family bonds. Sharing food from one common platter and eating together creates a sense of intimacy among individuals, strengthening the sense of community.

Despite its cultural significance, hand-to-mouth dining in India has faced unnecessary criticism as "uncivilized" or unclean. Such discrimination often came from colonial prejudices that attempted to impose Western dining norms on Indian society. To challenge these misconceptions, it is crucial to appreciate the richness of Indian dining traditions. Hand-to-mouth dining is deeply rooted in Indian heritage and has withstood the test of time. Rather than dismissing it, it should be celebrated and sustained, recognizing its prominence in enriching a sense of identity and belonging.

SCIENCE & TECHNOLOGY

Chandrayaan 3: India's Moon Mission

~ Samarth Golash, Grade 10

I'm sure everyone has heard of Chandrayaan 1 and 2's successes, but how will Chandrayaan 3 fare in space? This is a question running through everyone's mind as India launched its 3rd moon mission. The Chandrayaan 3 mission is set to build on the successes of its predecessors and take India's space program to new heights.

The Chandrayaan 3 has been launched using India's most powerful rocket, the Geosynchronous Satellite Launch Vehicle (GSLV) Mk III. The rocket is expected to land on the moon's

surface on 23rd August 2023. One of the main goals of the Chandrayaan 3 mission is to land a rover on the moon's surface. This will be a significant achievement for India, as only a handful of countries have successfully landed rovers on the moon. The rover is equipped with a range of scientific instruments that will allow it to study the moon's surface in detail.

However, the rocket will face a range of challenges, including extreme temperatures, radiation, and vacuum conditions. Nevertheless, the Chandrayaan 3 has been designed to withstand these conditions and is equipped with advanced technologies which can aid its survival in space.

For example, the spacecraft is equipped with thermal insulation to protect it from the extreme temperatures of space. It also has radiation shielding to protect the sensitive electronic components. Along with this, the spacecraft will have a huge number of backup systems in place in case anything goes wrong. All these factors provide some insight as to whether the Chandrayaan 3 will be able to survive the brutality of outer space.

Nothing: A Breath of Fresh Air in the Realm of Tech

~ Avaneesh Gondyalai, Grade 10

In a world where every tech brand practically follows the same "white" and "plain" design language to mimic Apple's successful minimalism approach, it's rare to find a brand that aspires to be the polar opposite. Well, enter Nothing, the tech brand that may just revolutionize how we think of our gadgets look and feel.

Better watch your step Apple, the new kid is here! That's right, there appears to be a new company making a name for itself within the tech space, and they go by the name "Nothing". Nothing brings a fresh new look to the minimalist-dominated tech industry.

Nothing introduced the "ear(1)" in 2021, a pair of wireless earphones housed in a distinctly translucent plastic casing, officially entering into the tech space. It wasn't until 2022 when Nothing created their first smartphone, the Nothing Phone(1). This phone featured the same transparent body

featured in the ear(1) but with a unique twist: LED's. The back of the Nothing Phone(1) featured various LED lights which work with

the software to display notifications, sync with ringtones, and be a display for composing music. Called the "Glyph" interface, the Nothing Phone(1) provided a flashy way to interact with your phone without physically lifting it up. Needless to say, the concept caught on and quickly spread Nothing's name through the tech industry. After all, it's not every day that a new non-minimalistic design language actually catches on. Within just 3 years, the company has sold over 1,000,000 of its products globally and, with the company's consumer base growing daily, it looks like Nothing is here to stay.

ECONOMICS & BUSINESS

The Rise Of Drop Shipping

~ Ansh Sonthalia, Grade 9

Dropshipping has emerged as a popular business model in the realm of e-commerce, transforming the way entrepreneurs establish their online stores. This innovative approach to retail allows store owners to sell products without the need for inventory management or shipping logistics. Instead, the responsibility of storing and shipping products lies with the suppliers or manufacturers, enabling entrepreneurs to focus on marketing and customer service.

One of the primary advantages of dropshipping is its low barrier to entry. Unlike traditional retail models that require substantial upfront investment in inventory, dropshipping allows entrepreneurs to start their businesses with minimal capital. This makes it an attractive option for individuals with limited resources or those who wish to test the waters of e-commerce without significant financial risk.

However, dropshipping does come with its own set of challenges. Since the store owner does not have direct control over inventory and shipping, they rely heavily on their suppliers. Issues such as product quality, stock availability, and shipping delays can potentially impact customer satisfaction and the store's reputation. It is crucial for entrepreneurs to establish strong relationships with reliable suppliers and maintain open lines of communication to mitigate such risks.

In conclusion, dropshipping has revolutionized the way online stores operate, offering entrepreneurs an accessible and flexible business model. However, it is essential to carefully manage supplier relationships and consistently provide excellent customer service to ensure long-term success in the competitive dropshipping landscape.

Russia halts initiative that allows Ukraine's export of grain

~ Shravya Reddy, Grade 9

Starting July 2023, Russia exited from a wartime deal that allowed grain to flow from Ukraine to countries in Africa, the Middle East, and Asia where there is a greater hunger threat and higher prices have forced people into poverty. The Black Sea grain Initiative has allowed three Ukrainian ports to export 32.9 million metric tons of grain and other food to the world. UN secretary general Guterres says the termination of the deal will result in more human suffering. The war in Ukraine has sent food prices to record highs in the past year and has contributed to the global food crisis. Rising food prices are affecting developing countries more because food takes a larger share of a poor family's income.

Both Russia and Ukraine are major global suppliers of wheat, barley, sunflower oil, and various other foods that developing nations are dependent on. The landmark deal was formed to help reduce the already soaring prices of wheat, vegetable oil, etc. Russia has complained that restrictions on the shipping and insurance have hindered the progress of its own agricultural exports, although it has shipped out record amounts of wheat for the past year. Already, the initiative's suspension has sent wheat prices up a three percent increase in Chicago trading. Most analysts perceive it'll only be a temporary push in food staples traded on global markets since Russia and Brazil have slowly increased wheat and corn exports.

The world waits to watch whether Russia will weaponize its wheat exports. Being the world's largest wheat supplier, Russia could hike its export taxes and raise world grain prices, allowing Russia to finance more of its military campaign in Ukraine.

POLITICS

Opium – A Common Connection Between China, India, US and UK

~ Srivalli Konakanchi, Grade 11

The histories of the most influential nations of the twenty-first century all point to a common thread: the growing addiction of young people to opium. Opium consumption in these four nations stretches back to the nineteenth century.

At the beginning of the nineteenth century, the Chinese goods trade was exceedingly remunerative for the United Kingdom. In exchange, the British would supply the Chinese with silver. As a consequence, the country's silver reserves decreased at astronomical rates. To address the silver shortage in the United Kingdom, the East India Company along with other American merchants began illegally exporting Indian opium into China in exchange for silver. These illicit opium imports into China resulted in a disorderly and unbalanced market.

Subsequently, China refused to maintain diplomatic relations with Britain. In effect, China endured two opium wars that resulted in national humiliation and widespread use of the drug became an addiction. However, the UK greatly benefitted from the Chinese goods trade as it had received an opportunity to expand its economic and territorial influence in China.

In conclusion, The history of opium and its role in influencing the destinies of some of the most influential nations of the nineteenth century have had a lasting impact on the world today.

Mike Pence Joins the Presidential Race

~ Akshay Aribindi, Grade 10

It's July and the race for the 2024 election has just begun. Despite the numerous indictments levied on Donald Trump, he continues to fight for the 2024 elections in hopes of running for another presidential term. However, support for Trump is continuing to escalate as the United States approaches the 2024 elections. Though this may seem surreal, Trump has a chance at actually winning the upcoming elections. But, he has a close competitor. His former Vice President, Mike Pence, is joining the race for the 2024 elections against him. In this article, we will discuss Mike Pence's campaign and his rivalry with Trump.

First of all, how strong is his campaign? Pence's campaign doesn't have many supporters and is struggling to expand. If there are any supporters for his campaign, they're mostly from his hometown, Indiana. However, his campaign continues to gain donations and more followers day by day. So, it wouldn't be realistic to determine if Pence could overtake Trump's rapidly expanding campaign this year as we're only in the beginning of the presidential race.

Secondly, is Mike Pence considered as a competitive rival for Trump? No, Pence's campaign cannot currently compete with Trump's growing campaign. However, he says that "anyone who puts themselves before the Constitution should never be President" at his campaign launch. This may cause people to leave Trump and join Mike Pence in the presidential race.

In conclusion, though Mike Pence's campaign may not seem strong as of now, he has potential to be a competitive rival of Trump and perhaps even the next president of the United States.

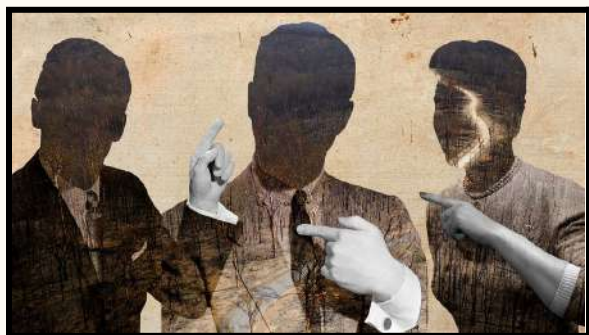

OPINIONS

Is Pressuring Developing Countries To Reduce Their Emissions Fair?

~ Rahul Iyer, Grade 9

Global warming is one of the most daunting global issues of the 21st century and every country is trying to do its part to combat it. Every country is being held responsible to reduce its emissions by a certain amount. However, this doesn't seem to be very fair for developing countries.

Around over 250 years ago, when now-developed western countries were still mostly farmland, the industrial revolution began. From here towards the 21st century, only these countries have generated massive emissions along with equally impressive development. During this period, other countries were colonies and did not contribute to the increase in carbon footprint. Only recently have we been made aware of the disastrous impacts of greenhouse emissions. But it cannot be fair for every country to reduce their emissions when the US and the EU have had combined historical emissions more than 50%.

The historical emissions of certain countries have given them a huge edge in development. Limiting the emissions of developing countries will significantly delay the time required for them to catch up. Rather than attempting to equally reduce emissions, developed countries should be pressured into reducing their emissions by a lot more to make up for their historical emissions. Only once other countries have caught up in development should they also be made to reduce their emissions. This would help equalize development among different countries and still combat climate change.

Why ChatGPT is a useful tool for students

~ Urvi Gupta, Grade 11

The world is undergoing a tremendous transition and technological growth through Artificial Intelligence or AI. At the forefront of AI technology, is the infamous AI chatbot - ChatGPT, which is capable of generating human-like

conversational dialogue. Just like every other product that gets released in the market, ChatGPT has sparked controversy and raised concerns regarding plagiarism. However, instead of being a bane to society, ChatGPT can be an invaluable tool for students if used wisely and to its full potential. The foremost and primary application of ChatGPT lies in providing research assistance. Research plays a major role in a student's life since every report and paper they submit requires a large amount of research. However, this can be a time-consuming task and sometimes may not provide the results students are looking for. On the other hand, chatGPT can provide students with the exact information they are looking for in just a few seconds. It can also provide multiple perspectives on one topic as well.

In addition, another application of ChatGPT is providing personalized feedback to students. ChatGPT can act as a virtual tutor or study companion, providing explanations on various subjects and answering questions related to coursework, helping students understand complex topics.

In conclusion, ChatGPT emerges as a revolutionary AI chatbot with multiple applications in the education industry. From research assistance and personalized feedback to acting as a virtual tutor and aiding in time management, this AI chatbot can significantly enhance students' academic experiences.

ENTERTAINMENT & POP CULTURE

Barbie's Journey With Feminism

~ Anika Bhupatiraju, Grade 7

Barbie has always been a huge sensation, now even more so since Barbie (2023) the movie directed by Greta Gerwig has officially debuted. Even though rated for kids 7 and above, Barbie has caught the attention of both young children and older audiences. Barbie has played a significant role in influencing her young audience with her flawless appearance and glamorous lifestyle, and has appeared in 42 movies up until now.

While Barbie has immensely received praise for being a “feminist icon”, not even she could escape critique in the past. Barbie was designed by Ruth Handler in 1959, who was inspired by her daughter Barbra. Ruth Handler wanted to create a strong and independent woman who wasn't restricted to the gender norms and stereotypes that were prevalent during that time.

Barbie was initially embraced and praised for teaching young girls that they could be anything. However, she has faced criticism from some feminists for perpetuating gender stereotypes and promoting “unrealistic” body standards. Barbie dolls have also been criticized for their lack of racial diversity and their representation of a narrow standard of beauty. Barbie's emphasis on fashion, makeup, and physical appearance has been criticized for contributing to a culture that places excessive importance on looks and external beauty.

Acknowledging these concerns, the company behind Barbie went their way out to remake her image to align its values with feminism and women empowerment. Over the years Barbie has been relaunched with realistic body proportions and several races. Barbie has been portrayed to be intelligent, talented, and smart. She has over 200 jobs and has been to the moon! Barbie has been receiving positive attention from the media and critics alike for proactively taking action to recreate the narrative. Barbie's journey from a controversial figure to a feminist icon is a perfect showcase of the power of recognizing and responding to social concerns even in the entertainment industry.

SERVICE & LEADERSHIP

Raising Funds For Mental Health Resources – A Teenager's Story

~ Sivani Jaggavarapu , Grade 11

Mental health has gained a significant amount of attention. With the rise in awareness and understanding of mental health issues, it is clear that more needs to be done to support those struggling. However, despite the heightened awareness, resources and support for mental health are often inadequate and inaccessible. However, this teenager has changed that. Here is the story of The Conan Fund.

After suffering from the tragic loss of his father, who sadly took away his own life due to lack of resources to help his mental illness, Jacob Grosberg considered how others also had to suffer

the same fate. He wanted to change the world. He founded The Conan Fund, a charitable organization, to assist those with similar circumstances to his father and provide them the support they needed to succeed.

The Conan Fund is a charitable organization that generates funds to help non-profit mental health organizations. These institutions dedicate their efforts to offering crucial assistance and valuable resources to individuals in dire need. Moreover, the fund also extends its reach towards education by providing knowledge on mental health within educational institutions. Additionally, it is responsible for organizing enriching events that further spread awareness of mental health.

This organization illustrates that no matter how much awareness is spread, there still needs to be more resources helping the cause. It inspires others to support such reasons, as actions speak more than words.

From Passion To Purpose: Unraveling The Unstoppable Journey of Ms Vandana Shiva

~ Ananya Venigalla, Grade 11

In this world that longs for healing and unity, the call for service echoes louder beckoning us to become change makers and architects of compassion. In our world where silence can be deafening, individuals rise as the voice for change and help in paving a path leading towards a brighter tomorrow where hope lies as a ray of light in an overcast chamber. Amidst the chaos that rises, activists emerge as models for hope, creating a blazing fire that reaches the darkest ends of the society, willing people to act with compassion.

These activists' direct melodies for change and conduct harmonies that can be heard beyond the ordinary boundaries. One such unsung, prominent, and compassionate leader in

the field of environmental activism and social justice is Ms. Vandana Shiva. Her tireless efforts to bring change and to advocate for the rights of oppressed individuals, and her unique perspective on Globalization is what distinguishes her from people around her.

Ms. Vandana Shiva has played a vital role in assisting organizations with her support and is a predominant figure known for her advocacy for sustainable agriculture and biodiversity conservation. She has been a vocal critic of agribusiness corporations and has initiated many actions that could assist in the conservation of nature. Her words and work have been the source of inspiration to many people and organizations to act towards building a brighter future for tomorrow.

Ms. Vandana Shiva's leadership and contribution have earned her global recognition and she has also received multiple awards for her activism. Her work continues to inspire many around the world, making her a role model for individuals.

HEALTH & LIFESTYLE

Back to School Once Again – New Routines in the New Academic Year

~ Nitya Kashyap , Grade 10

A new school year means it's time to get back into routine, be disciplined about our schedules, start sleeping, waking up on time and start managing our school work all over again. For some the first day of school is dreaded, while for others, the first day of school is a highly anticipated after long summer months of boredom.

A problem most of us face when we go back to school is getting back into routine and trying to settle down. After the summer we are often unprepared for the changes we face; academically, socially,

mentally and physically. Even though starting a new school year and moving up a grade is a yearly event, the fear and adrenaline we feel beforehand never changes. Here are a few basic ways we can start getting our routine more in line:

- Start making to-do lists (you'll feel a lot more organized) - It's as simple as noting down any homework or deadlines you have to make sure you know what's coming ahead.
- Map out your day - Similar to making to-do lists, write down a small agenda or a goal list for yourself everyday.
- Do not jump to conclusions and give up - Change does not happen in a day. Don't be afraid to talk to your teachers.
- SLEEP - Your body and brain needs the rest after a long day of juggling school, family and friends, so give yourself the sleep it deserves.

Following all these tips and tricks isn't going to be easy. It takes time to actually sit and do these small activities, but if you accomplish them well enough, you as a student would see a drastic difference in not only how you feel, but in your overall attitude about handling life in general.

Tech Driven Fitness – The Role Of Technology In Achieving Health Goals

~ Nashitah Hussain , Grade 11

Gone are the days of manually counting steps or jotting down workouts in journals. The age of tech-driven fitness is now in full swing, with wearable devices and health apps taking the

spotlight in our quest for a healthier life. By putting the power in our hands, they have empowered individuals to take charge of their well-being through personalized insights, tracking capabilities, and unwavering motivation to stay active.

Fitness trackers and smartwatches have become the perfect companions for health-conscious individuals. These nifty gadgets seamlessly integrate into our daily lives, monitoring crucial health metrics like heart rate, steps taken, calories burned, and even sleep patterns. By analyzing this data, these devices offer valuable insights into our daily activity, enabling us to make informed decisions about our lifestyle choices and exercise routines.

Complementing wearable devices are health apps, offering a wealth of comprehensive health and fitness solutions right at our fingertips. From fitness coaching and workout tracking to nutrition planning and meditation guidance, these apps cater to our individual needs and goals. With a wide range of exercise routines and diet plans, we can find the perfect fit for our preferences and fitness levels.

Nevertheless, while embracing these tech-driven fitness advancements, it's crucial not to let them completely replace the human touch. Striking the right balance between technology and personal interaction in our fitness routines is key to achieving a healthier and more active lifestyle.

REVIEWS

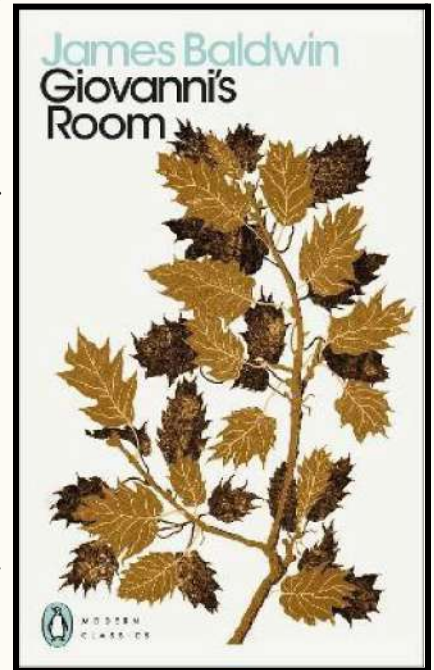

Book Review – *Giovanni's Room* By James Baldwin

~Manasvini Naren, Grade 12

James Baldwin, MacDowell Fellow and recipient of the highest French Order of Merit – “*Ordre national de la Légion d'honneur*”, is one of the most highly celebrated authors in the literary community and many of his works have remained lasting pillars of representation for both the Black and Queer communities. *Giovanni's Room* being one of them and broke new ground in exploring the depth and complexity of queer people while simultaneously paving the way for a generation of Queer fiction to be published.

In *Giovanni's Room*, Baldwin utilizes a non-linear narrative structure as well as a first-person perspective to heighten the sense of conflict. The inner conflict is between David (the narrator) and his own internalized homophobia, and the external conflict arises from a similar position of societal expectations on the taboo relationship.

Baldwin's language is fluid yet is brimming with descriptions and information, paragraphs go on for pages and chapters go on even longer. A common critique of Baldwin's writing is an overflowing page of imagery and descriptions but it only heightens the immersive experience of romance in the suburbs of Paris.

Another incredible skill that Baldwin demonstrates in his writing is restraint—he exhibits restraint in giving away too much information which leads the final emotional reveal to have a striking and tragic impact on the audience. Another manner in which Baldwin expresses restraint is in not going overboard with the harrowing narrative of the story. Shame, fear, and repression are common themes in Queer books as they are a major part of the queer experience, yet Baldwin manages to weave in the more joyful, romantic and heartening aspects of the romance into the book. This somehow ends up making the final heartbreaking reveal of the book even more moving.

This book is a must-read for fans of classics, queer fiction and social commentary. While the writing of the book may be on the heavier side, the final twist of the book is one that leaves readers feeling both hollow as well as satisfied. Most of all, the impact of this piece of writing by James Baldwin cannot be understated.

Sports

FIFA Women's World Cup, Breaking Records Yet Again

~ Medha Koppula, Grade 9

The FIFA Women's World Cup started over 30 years ago in 1991. The paramount of women's football is again setting new records with every single match. Now on their ninth edition, with 64 matches lasting 29 days, 32 countries are fighting for the coveted title of Women's football world champions.

Making history by selling over 1.5 million tickets this year, this year's edition can now be called the most attended women's sporting event ever. "Be proud of what will be the biggest event -- not just sports event -- that has been organized here so far." said Infantino, the president of FIFA.

The unexpected demand led FIFA to change their venue for Australia's opening match against Ireland to an 83,500-capacity Stadium, the largest one in the tournament. Apart from the high demand for tickets, the digital viewership has also exceeded expectations. According to Fox Sports, 6.43 million people had watched the draw match between the Netherlands and the U.S on the 27th of July

The FIFA Women's World Cup is an empowerment and encouragement to women in sports all around the world, and this year's outstanding results make it all the more worthwhile. As Infantino has stated - "The matches are of an extremely high quality. For the first time 32 countries are participating, eight debutants, and there have been great games, great goals and some underdogs who create surprises or give a tough time to the favorites." Promising us a great tournament to look forward to.

Max Verstappen's Hungarian Grand Prix Dominance

~ Samvit Reddy Punnam, Grade 9

In the world of Formula 1, records are made to be broken, and Max Verstappen, the young Dutch racing sensation, has been on a relentless pursuit of greatness. The Hungarian Grand Prix bore witness to an extraordinary feat as Verstappen secured his 12th consecutive win, cementing his status as a true force to be reckoned with in the racing world. From the moment the lights went out, it was evident that Max Verstappen was determined to extend his astonishing winning streak. Racing for Red Bull Racing, the 25-year-old prodigy showcased a masterclass in driving skill, precision, and tactical brilliance on the demanding Hungarian circuit.

The Hungarian Grand Prix is renowned for its tight and twisty nature, requiring precision driving and strategic tire management. Verstappen demonstrated his versatility by expertly

navigating the corners and maintaining a blistering pace throughout the race. Despite a competitive field, he made sure to keep his rivals at bay, leaving no room for error. Verstappen's triumphant run was also a testament to the exceptional teamwork between the driver and his Red Bull Racing crew. From strategic tire changes to calculated pit stops, every move was executed flawlessly, giving Verstappen the edge he needed to continue his winning streak. With each successive victory, Max Verstappen has been steadily closing the gap in the Drivers' Championship. His relentless pursuit of excellence has seen him surpass seasoned rivals, and his unparalleled consistency has put him at the forefront of the title race.

CREATIVE CORNER**Poem:**

~ By Praveenya Neelam, Grade 10

An Ode to Sky

O' the mighty sky
The incredible characters of yours
As you shapeshift to twilight
To a reminiscent tinge of bloody red
When you act childlike and sob
You unmask a shade of gray haziness
Yet my beloved color of yours
Is the shade of pitch darkness
As I get to gaze into
The babies you shield during the day
And the celestial stars you let free at darkness
As they giggle and play
Radiating their brilliance
O' the mighty sky
The astounding characters of yours.
